

What Should My Child Be Doing?

Here are some things that your child should be doing every day:

Age – 4 Years

- follows directions with 3 parts (first get some paper, then draw a picture, last give it to mom)
- sentences sound like adult speech
- tells stories with a clear start, middle and end
- uses their words to try to solve problems
- lots of imagination when playing
- most people can understand them almost all of the time
- can make up simple rhymes (cat-bat)
- knows some of the sounds letters make (T says “tuh”)
