

## What Should My Child Be Doing?

Age – 9 Months

Here are some things that your child should be doing every day:

- makes lots of sounds every day like “bababa”, “duh duh duh”
- uses their voice to get your attention
- looks when you call their name
- hears sounds like as the dog barking, the phone ringing
- looks at a toy, then looks back to you when they want the toy
- likes being with people
- likes to play peek-a-boo
